

# Home-Made Clay

Great for Easter Pendants

## Ingredients:

For the mixture:

- Flour 1 cup
  - Salt  $\frac{1}{2}$  cup
  - Water  $\frac{1}{2}$  cup
- + Thicker thread

## Preparations:

Place the dry ingredients in a bowl and mix them well with a spoon or a whisker. Gradually start adding the water while mixing until dry, big lumps start to form. Knead it a bit with your hands until the consistency is no longer sticky.

Now that you have your clay you can cut it into even pieces and start your crafting process. Keep in mind this homemade clay doesn't require baking but a little bit of extra planning since it needs around 48h to dry completely.

After your clay creations are fully dry, you can continue with painting them. You can use any watercolor or acrylic paint you have at home, however, if you want the pendants to be even more in the sustainable Easter spirit, we recommend using the natural egg dye we told you about earlier.
